

International Entrepreneurship Week 2022

Facing the ever-changing world
Building up a self-ecosystem
Realizing sustainable development

Panel Discussion 1

Oct. 19th , 20:30 – 21:15, GMT+8

- **Topic:**

Trends and entrepreneurial opportunities regarding carbon-neutral technologies to address the climate change

- **Description:**

The extreme high temperature and drought that most people living in the Northern Hemisphere have experienced last summer remind us of the deep impact of climate change. This panel will discuss on the trends of carbon-neutral technologies under this circumstance as well as the potential opportunities for entrepreneurs and startups who are involved directly in carbon-neutral technology but also those who are engaged in other domains, the businesses in which could also bring contribution to attaining the objectives of carbon neutrality for the years to come.

- **Panelists:**

Dr. Debashish Raha *Post-Doctoral Doctor of Science (DSc); PhD in Engineering, University of Wollongong, Australia*

Dr. Sudeendra Koushik *Innovation Director & Head of CampX by Volvo Group, India*

Ms. DONG Xue *Associate Professor
China-UK Low Carbon College of SJTU, China*
